employee**

01.09.2026

**Engineering &
Technical**

With the passion of our people, we contribute to a sustainable future by creating innovative products in e-mobility for our customers.

Samsung SDI Battery Systems is a global technology leader in e-mobility. Together with our customers in the automotive industry, we develop, test and industrialize innovative Lithium-Ion Battery packs for hybrid and electric vehicles.

The technology center of Samsung SDI Battery Systems is located in Kalsdorf, Austria, close to Graz.

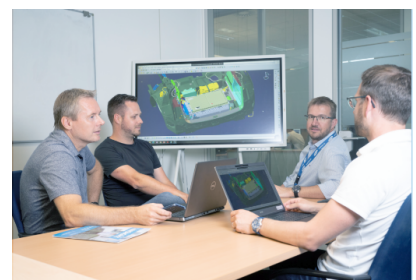

Your core responsibilities are:

- Support to shape and optimize the procurement processes
- Responsible for interface activities of engineering and operation between local business unit and headquarter in Korea to coordinate engineering information and issues to monitor and to guide pack development projects
- Coordinate collaboration between headquarter in Korea and local business unit for development projects and general operations
- Manage product development and change management process

Modern work environment in an European technology center for battery development and testing

>more about facility

Have a say and think differently. In a team that lives the future.

>more about working with

via ensuring standardized implementation in projects

- Plan and manage development and operational investments, including budget planning, approval, execution tracking, and variance management
- Execute monitoring, controlling, and standardization of processes and risks (cost, quality, delivery)
- Perform regular program monitoring, reporting, and review meetings
- Continuously improve development planning, operational processes, reporting, and investment management

What you need is:

- Bachelor's or Master's degree in engineering, business administration or related fields.
- Minimum of 2-years relevant experience, preferably in automotive, battery or similar industries
- Experience in project planning/management and cost controlling
- Very good knowledge in MS-Office (Excel, PPT, Word) and MS-Project is an advantage
- Strong knowledge in SAP(ERP), Teamcenter, PTC, PLM systems are desirable
- Strong analytical, organizational, and problem-solving skills, with a structured and process-oriented mindset.
- High-Quality Awareness and continuous improvement mindset
- Analytical thinking, independent and team-oriented work, good communication skills and excellent organizational skills
- Fluent in English and Korean, both written and spoken (minimum level B2); German is an advantage
